Art Unit: 2137

DETAILED ACTION

1. Claims 1-5, 7-11, 13-17 are pending.
2. Amendment filed 01/25/2005 has been received and considered.

Drawings

3. The objections to the drawings have been withdrawn based on Applicant's remarks and amendments.

Claim Objections

4. Claim objections have been withdrawn based on amendments.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 15 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 15 merely claims a computer program arranged to configure a computer to implement a method. This non-functional descriptive material, and is not statutory because it is not a physical "thing" nor a statutory process, because there are not "acts" being performed. Such claimed computer programs do not

Art Unit: 2137

define any structural and functional interrelationships between the computer program and other claimed aspects of the invention which permit the computer program's functionality to be realized. Since a computer program is merely a set of instructions capable of being executed by a computer, the program itself is not a process, without the computer-readable medium needed to realize the computer program's functionality. In contrast, a claimed computer-readable medium encoded with a computer program defines structural and functional interrelationships between the computer program and the medium which permit the computer program's functionality to be realized, and it is thus statutory.

Allowable Subject Matter

6. Claims 1-5, 7-11, 13-14, 16-17 are in allowable form.
7. The prior art does not show the limitation of creating multiple copies of each section of the plurality of sections of the data file; applying to each set of multiple copies a set of elementary watermarks such that each copy of a section contains a different elementary watermark; and storing the elementary watermark containing copies of each section.

Art Unit: 2137

Response to Arguments

8. Applicant's arguments towards claim 15 filed 01/25/2005 have been fully considered but they are not persuasive. Applicant argues that a data carrier comprising a computer program arranged to configure a computer to implement a method falls within the statutory basis under 35 USC 101. However, like discussed in the phone interview a piece of paper with computer program code written on it would be a data carrier arranged to configure a computer to implement a method. Examiner reiterates the suggestion to amend "data carrier" to "computer program product."

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated

from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
